### Steps

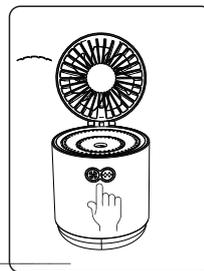

- ① Turn counterclockwise to open lid

- ② Add water into the water tank

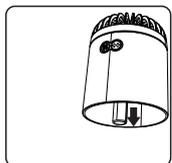

- ③ Turn the cover clockwise up and connect the power supply

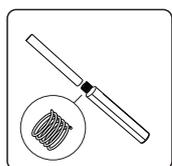

- ④ Click the buttons to start

### Cotton swab replacement

- ① Draw the filter bar and replace the filter

- ② Pay attention to the spring in bottom when replacing

### Attention

If you find several water drop accumulating, that means normal phenomenon at the model are working. Use dry paper to wipe it out. If the water tank is not used for a long time, keep it dry and clean to avoid bacterial growth. Do not add alcohol, aromatherapy, essence, essential oil and other liquids to affect the normal operation of humidifier. After using for a period of time, if there is a small amount of dirt on the inner wall of the tank, it is recommended to use a soft cotton cloth and a small amount of soda powder to wipe the inner wall of the water tank. When cleaning the product, please do not rinse directly with a water tap to avoid short circuiting. Unplug the power plug when refilling water and cleaning.
